

products

classic, funny, creative...what'll it be?

photobooth (closed booth)

Our fully customisable photo machines create the authentic feeling that only a retro cabin can provide. The intimate and exciting feeling that comes when you close the curtain brings you to the most romantic, funniest, coolest and memorable pictures you can keep forever.

>> pages 4-6

photo stand (open system)

Our photo stand offers you the possibility to have a compact, mobile photo studio for you. We offer a variety of backgrounds and props to choose from. In addition, the photo stand literally offers you enough space to think outside the box.

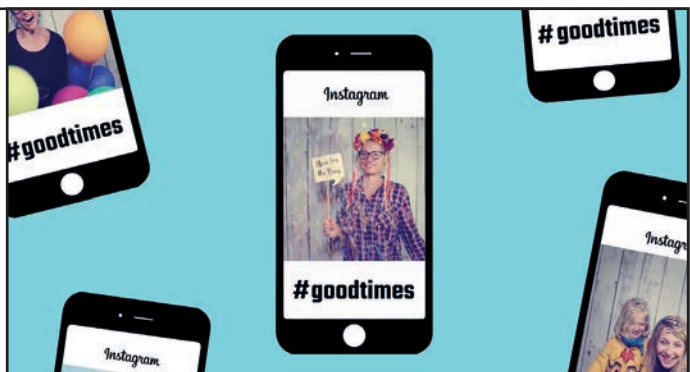

>> pages 7-8

hashtag printer

Did you know you have a photo booth in your pocket? The hashtag printer is an automated instagram printer that prints any image your guests take to Instagram with a specific hashtag: snap it, tag it, print it!

>> page 14

3D photography

Have you ever thought about stopping time? With our 3D photography service this is now possible. This unique and innovative way of photography allows you to capture every detail, every angle and every movement of a certain moment, literally freezing time

>> page 19

products

classic, funny, creative...what'll it be?

flip book

A flip book is nothing more than an analog video or GIF you can take home with you. With the help of a photo booth or a photo stand a short video is taken, which is printed within 90 seconds as a small photo book.

>> page 17

GIF-Booth

Dance a little dance, kiss your darling, throw confetti, pop the corks...
Our GIF-booths are the modern and funny counterpart to classic photo machines. From a series of four photos or a short video sequence, an animation is sent directly to your guests. This allows them to share their own GIFs directly on their social media channels.

>> page 18

Video-booth

The video-booth puts your guests in the spotlight and they can take a very personal message. Give your guests the opportunity to share memories, jokes, experiences, songs, congratulations or their best moves.

>> page 18

Extras & Features

individual props boxes, various backdrop systems, ready-made photo album sets, GIF feature, photo printing feature, online gallery deluxe, social media features, slide show module, individual voice output, wooden props, speech bubbles, coin slot, creation of custom photo filters

>> pages 9, 14-16

Greenscreens

No money or no time to fly to the South Seas? No problem with our green screen technology! We'll beam you to the mountains, the sea or the moon. One piece of hand luggage is included.

>> page 9

Branding & Features

Show your brand!

- external and internal branding
- custom photolayout
- individual backdrops + greenscreen
- custom voice output
- customized user interfaces
- themed props

With our wide range of products, the many customization options and the latest technology, almost anything you can imagine is possible. No matter whether you want to build brand awareness or recognition value at a trade fair or you want to improve your corporate image with one of our products at your customer event: We have the resources and experience to help you achieve your goals.

- customer magnet
- lead generation
- social marketing (analogue / digital)
- emotional experience marketing
- high interaction
- communication multiplier

hard facts

The images are printed in less than 15 seconds using the latest dye-sublimation printing technology /// The images are colourfast for decades /// 24/7 support via our service hotline and remote maintenance, if required, short-term on-site service /// Hostess support /// Upload of all photos into a password-protected online gallery /// Very easy operation via touch screen /// social media upload via Facebook, Twitter and e-mail /// Weatherproof, festival-proven machines /// modular system: parts fit into every lift and through every staircase

photobooth branding

Information for the creation of print data

To make it easier for you, we have already created the graphic templates for the individual photo cabin areas. You can find them in our info-folder in the folder „exterior branding“. For example, you can open the EPS files directly in Adobe Illustrator to create your individual branding. The red frame corresponds to the visible area as shown on the following pages.

If the lightbox (area number 8) is to be used with a text/graphic, please create it as a vector*. This allows printing as a cutting plot/ contour cut. If this is not important to you, area 8 can also be created like the other areas.

*Please convert fonts to paths!

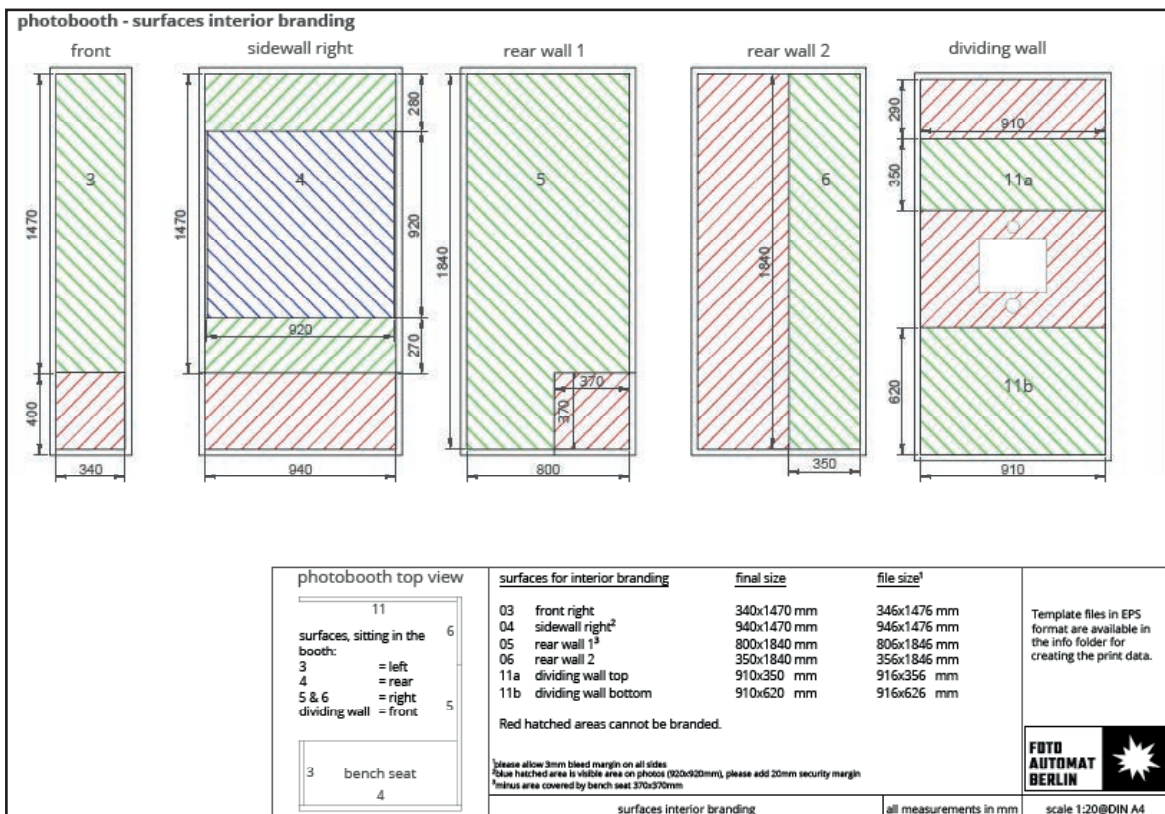

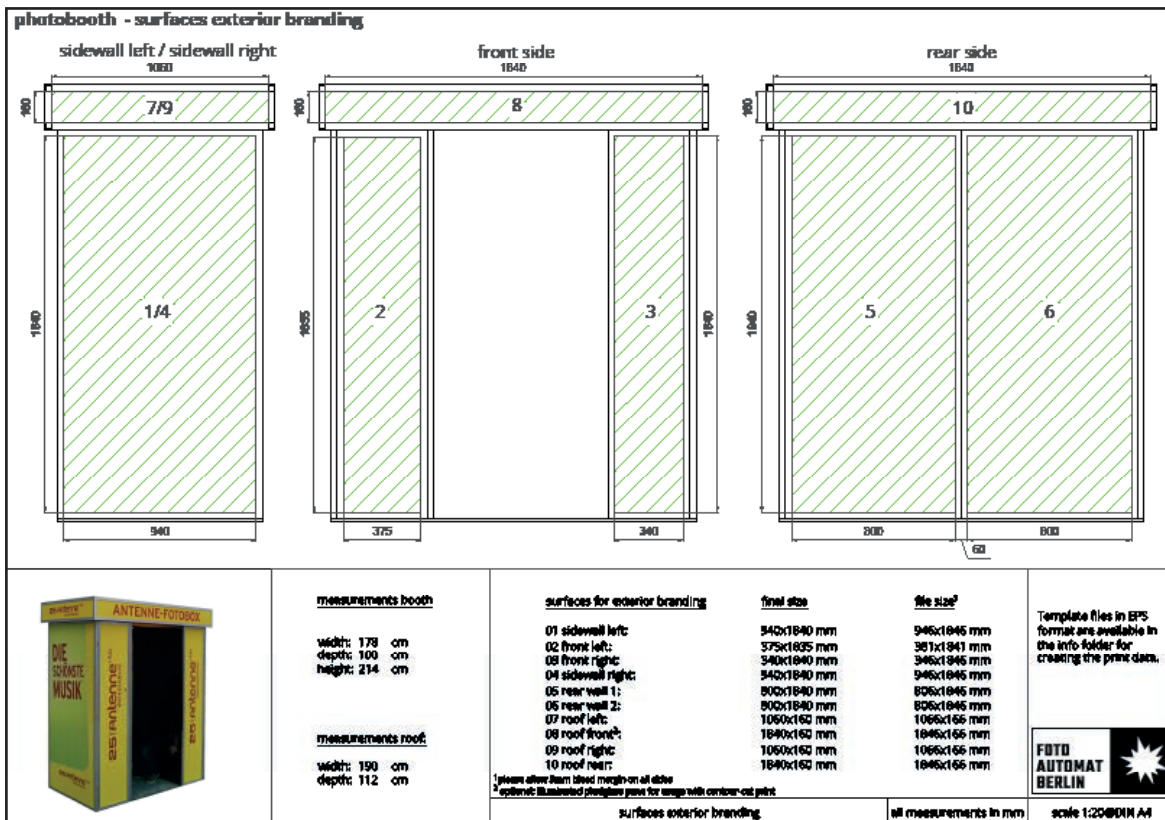

The total area of the document is the area to be printed. Elements outside the red frame (which are our crop marks) are not visible later. But please always create the background for the whole area.

We need the finished files as PDF-X or EPS files, at least 10 working days before your event. Please create the PDF files with a PDF program that creates printable PDF-X documents (Adobe product or similar)!

photobooth branding

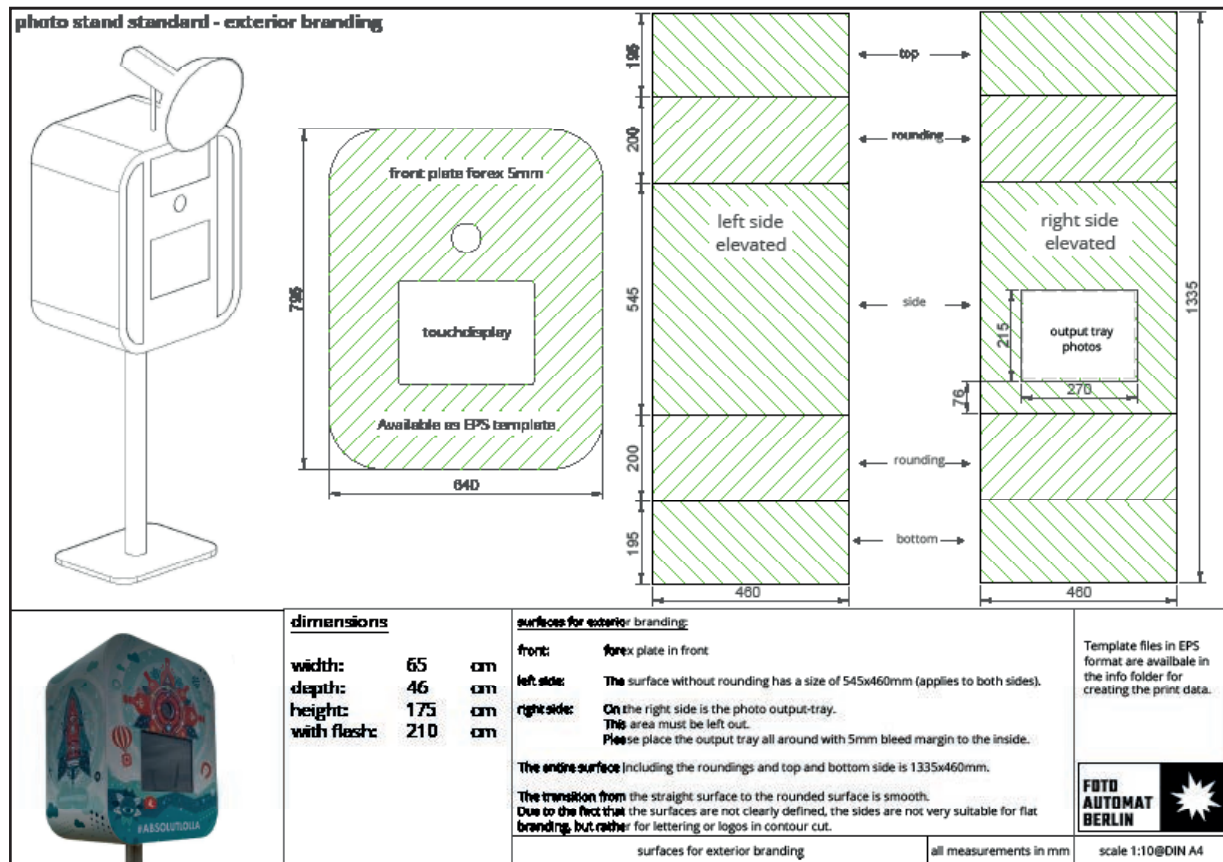

1x the complete package please!

This information can also be found separately in the info-folder as PDF files.

photo stand branding

that's how it's done:

This information can also be found separately in the info-folder as PDF files.

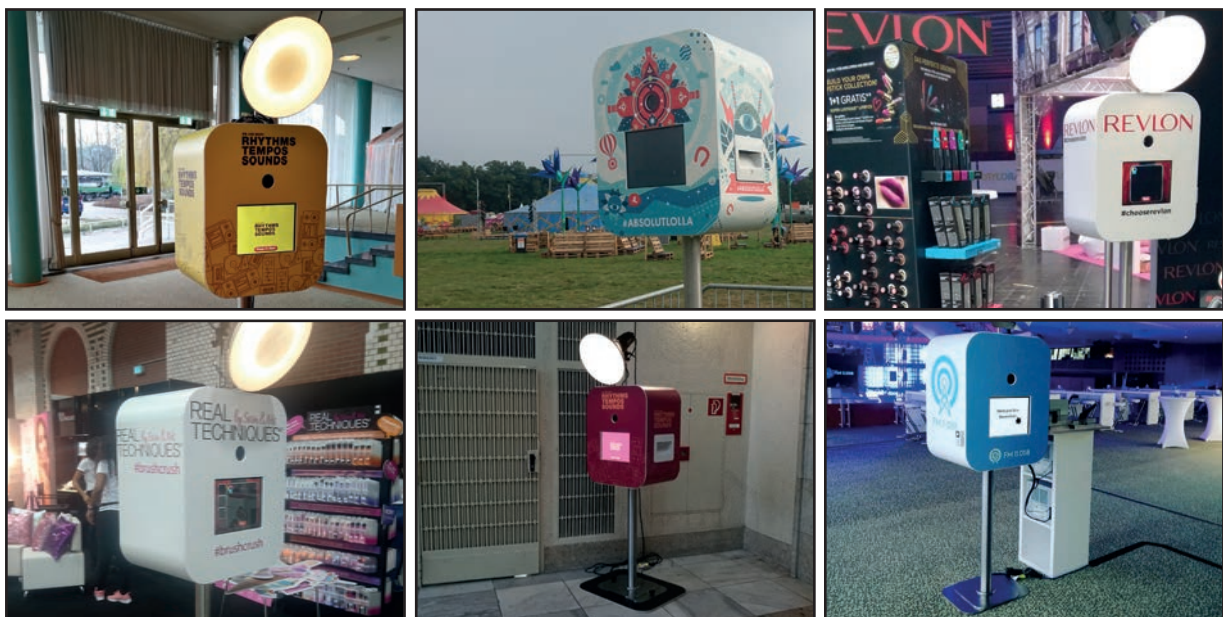

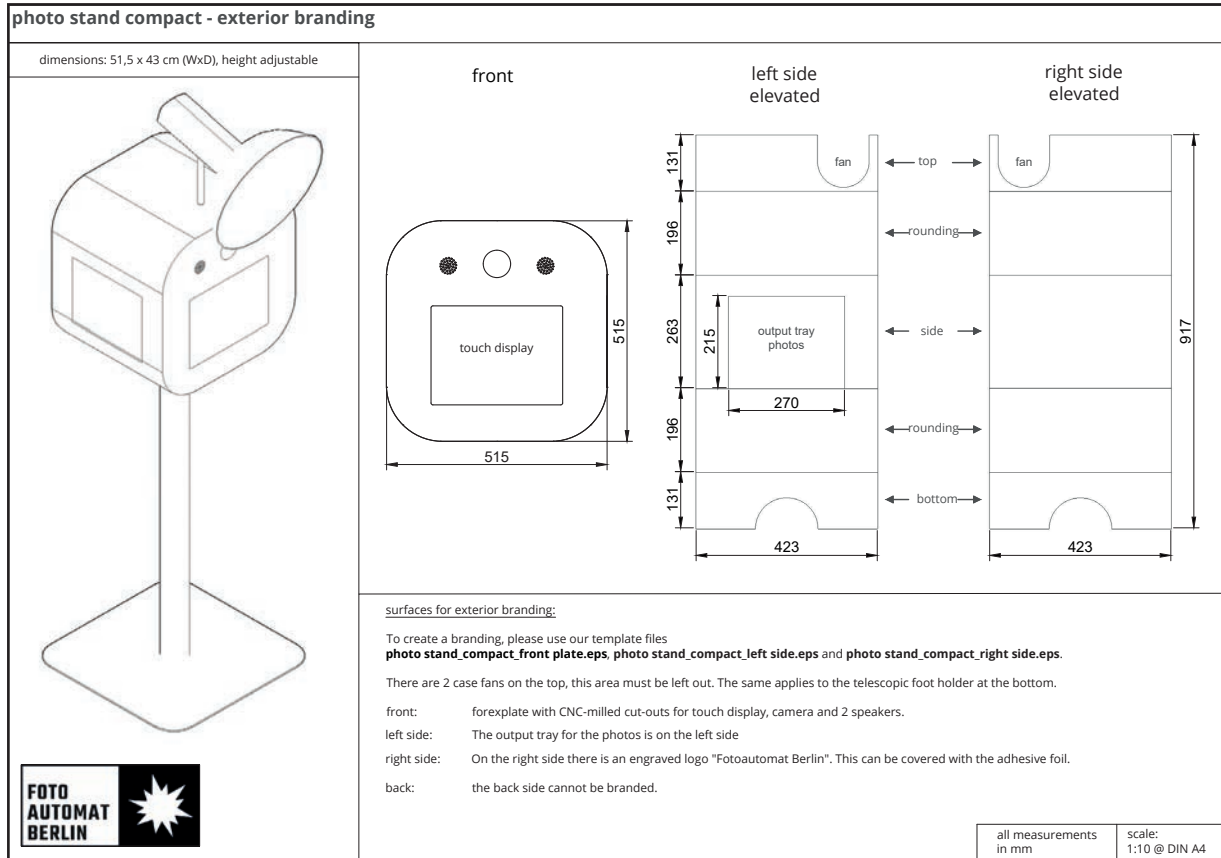

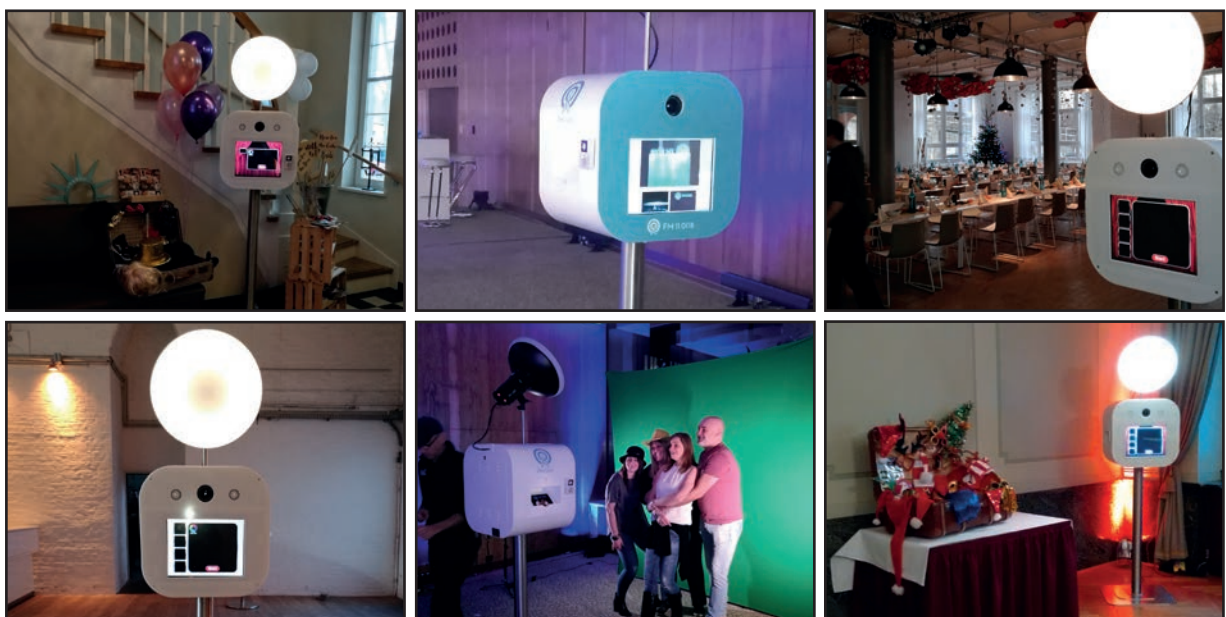

photo stand branding

slim size, same technology

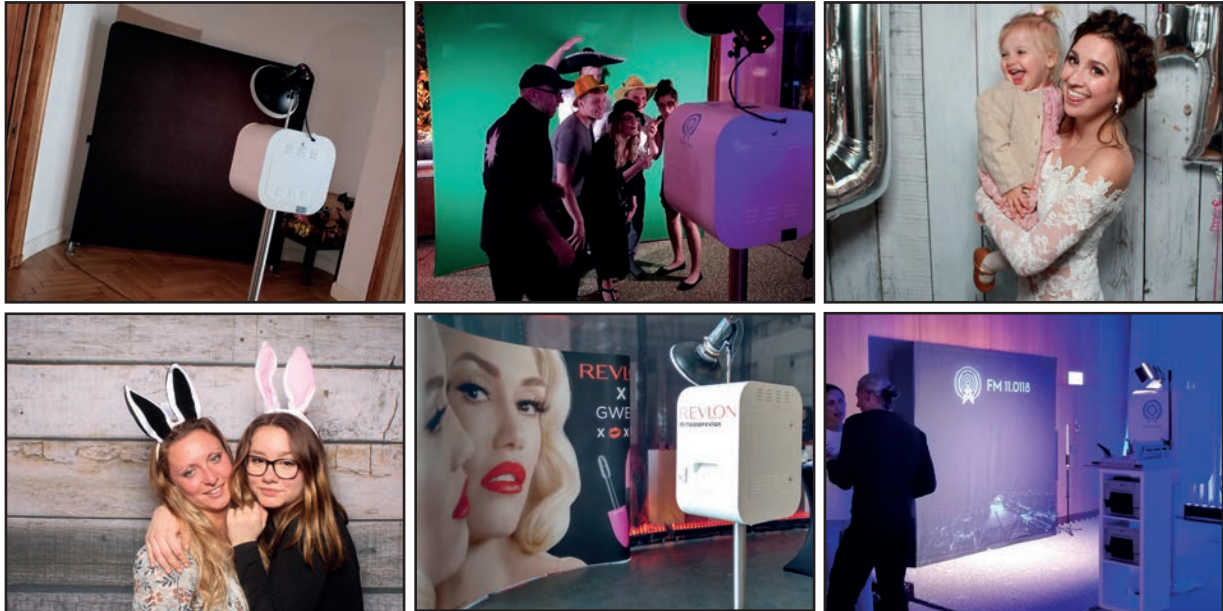

This information can also be found separately in the info-folder as PDF files.

backdrops

individual backgrounds and green-screen

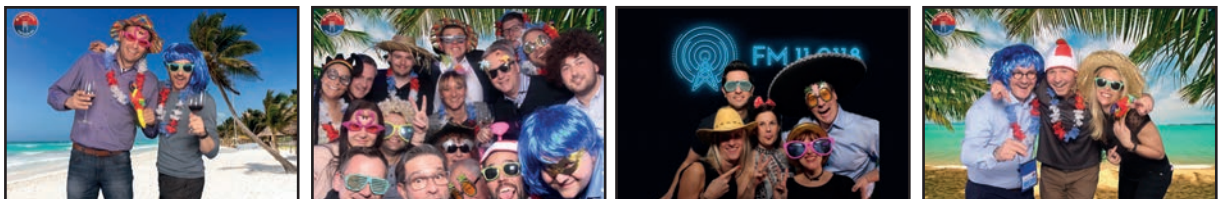

To give the photos, GIFs and videos that special something, we offer a selection of backgrounds from which you can choose. Besides our standard backgrounds, we can also create a branded background according to your wishes. In the folder „standard backgrounds“ you will find our complete selection.

backdrop infos

- square: 2,30 x 2,30m
- widescreen: 3.00 x 2.30m
- individual backdrop templates as PDF-X file format
- Image file resolution min. 150dpi, CMYK color mode
- special colours (pantone) possible

all template files for the
creation can be found in the
info-folder

green-screen

- the background system has a size of 2.45 x 2.45m
- the image format depends on the aspect ratio of the photo layout (square=1:1, widescreen=3:2, portrait =2:3)
- File template as JPEG, resolution of the image file 300dpi, RGB colour mode

photo layouts

a lot of space for your creativity

Almost everything is possible!

Colored backgrounds, overlays, logos, fonts, hashtags, graphics, two, three or 4 images...

On the next page you will find our 25 standard layouts for the photo prints.

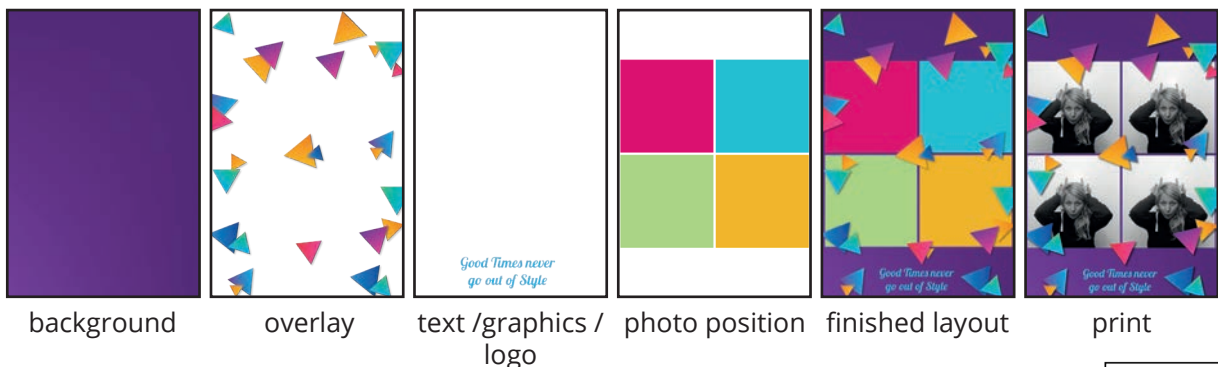

The layouts for photostrips (layouts 01 to 04) are cut automatically during printing, so that 2 identical photo strips with the dimensions 5x15cm are created. All other layouts have the postcard format 10x15cm. The folder „photo layout templates“ contains all 25 standard layouts with transparent background. These templates can be used to create your own.

Hints for creating your own layout:

- The image size of the layout must be **1240x1844px** with bleed margin, the resolution at least 300dpi. The final image area without the bleed margin is 1200x1800px.
- Please choose JPG or PNG as file format.
- Several layers (e.g. for overlay graphics) can be created.
- The image size of overlays must also be 1240x1844 px and the background must be transparent.
- Please save each layer in a separate file.
- If graphics are provided as open files, please either in a universal format such as EPS or ensure compatibility with Adobe CS2015.
- When rotating the photos (as above for „Antenne Brandenburg“) please only rotate integer degrees (e.g. 15°, not 15.5°!)

large formats in 15x20cm are also possible!

photo layouts

the agony of choice

Here you find all 25 standard layouts for the photo prints.

All layouts for photo strips (layouts 01 to 04) are cut automatically during printing, so that 2 identical photo strips with the dimensions 5x15cm are created. All other layouts have the postcard format 10x15cm. The grey areas can be branded, otherwise they remain white.

fonts

our selection for the photo layout

1. Arial	Zwölf Boxkämpfer jagen Viktor quer über den großen Sylter Deich
2. Arial Black	Zwölf Boxkämpfer jagen Viktor quer über den großen Sylter Deich
3. <i>Alex Brush</i>	<i>Zwölf Boxkämpfer jagen Viktor quer über den großen Sylter Deich</i>

31. TEKO	Zwölf Boxkämpfer jagen Viktor quer über den großen Sylter Deich
32. <i>lobster</i>	<i>Zwölf Boxkämpfer jagen Viktor quer über den großen Sylter Deich</i>

Of course, other fonts are also possible.

user interface customization

screens and voice output

- For an individual **wallpaper** we need a graphic as jpg in **1024x768px**
- The screen text can also be adjusted, but not the font.
- The example images above illustrate the elements overlaying the background at different times of the photo session. Using the template images in the „template for screen-background creation“-folder, an individual background image can be created.
- we integrate your wallpaper for free if you send us the logo (as PNG) and provide the background graphic (1024x768px).

examples for a custom user interface

The photo session is supported by voice output. It consists of 6 different announcements that are made at the following times:

- At the beginning of the photo session, immediately after the start and shortly before the first photo is taken.
- before the second photo is taken.
- before the third photo is taken.
- before the fourth photo is taken (If there is a fourth photo).
- When all photos are taken and printing begins.
- At the end of the photo session as farewell.

The files contained in the folder „audio-voice output“ are the greetings used by default. English voice output is also possible. In addition, you can include your own language files. We need the audio as **MP3**.

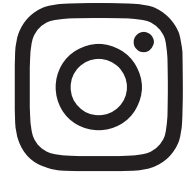

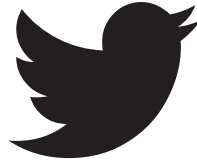

standard-voice „Berlin bluntness“

1. Ick gloob es jeht los jebbe.
2. Kiek doch ma inne Kamera.
3. Habta Spass? Dann sacht dit ma euerm Jesicht.
4. Sooo, jezz nochma n Schönet.
5. Fotos sind gleich fertig.
6. Eeh jezz ma raus hier, Andere wolln ooch noch.

social marketing

Facebook, Twitter, Instagram and Hashtagprinter

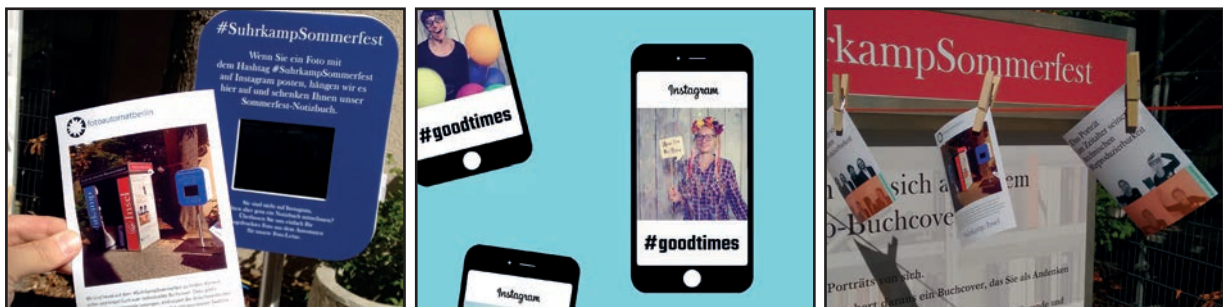

Our **social media module** allows you to share the photos you have just taken via email, Facebook, Twitter and Pinterest directly from the machine.

However, since August 2018, Facebook guidelines prohibit the posting via third-party apps. The only exception is posting on business pages. Posting via Twitter requires logging in to the respective user account.

For sending via mail, on the other hand, only the email address needs to be entered. The content of the email can be freely designed, e.g. with a call for a contest by sharing the pictures under a certain hashtag.

But it is also possible to share photos without any cumbersome user input: Our **Online Gallery Deluxe** offers an elegant solution for this (see page 15).

By the way: Instagram prohibits posting via third party providers, so direct sharing at the machine is not possible. For this special request we offer our # HASHTAGPRINTER.

The hashtag printer automatically prints all instagram and twitter photos that contain your individual hashtag. The photos must be shared publicly! Guests always use their own smartphone and share more photos of your event automatically!

Here are some more advantages at a glance:

- customer magnet
- reach & interaction
- user generated content
- logo, voucher code, layout integration
- participation from anywhere
- instant printout

additional options

Slide-show-module, online gallery deluxe, coin slot

The **slide-show-module** allows live playback of the images taken from the photobooth directly onto a beamer or flat screen (not included). New images are displayed immediately, the rest randomly. Additional advertising or sponsor pictures can be integrated. Besides the fun for the guests this is an attractive possibility for sponsor presentation.

In addition to the classic version, which also works offline, there is a deluxe version. It is fully customizable in layout and can display not only videos but also pre-defined instagramposts, Facebook pages or Twitter entries. An internet connection is required for this.

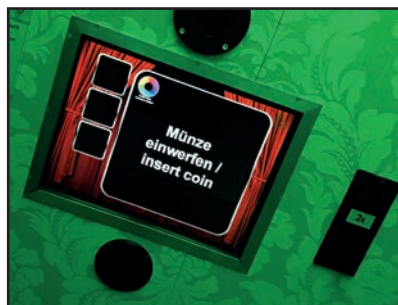

Online-gallery-Deluxe

For all products included in the price is the upload of the photos in a password-protected online gallery.

You also want to have the option to provide your guests/visitors with their pictures in a legally compliant and data protection compliant manner?

Then **our online gallery deluxe** is the right thing for you:

A QR code and/or a unique URL is printed on each printout, allowing access only to your own photo. The images can also be conveniently shared from this gallery. E.g. on Facebook, Twitter, by email or Whatsapp!

coin slot

- free adjustability of the coin value from 0,10€ to 2,00€
- offers a great opportunity for refinancing of the costs, especially when renting over a longer period of time

props & co.

writable speech bubbles, clown noses, wooden signs etc.

props case

On request we offer a theme-based compilation. In addition, there are different sizes to choose from, from the handy **standard props case** to the **props case „Deluxe“**, which comes in overseas size and also contains writable speech bubbles. From flamingo glasses and curly wigs to unicorn hairbands and stick-on moustaches, there is something for every mood.

Our writable speech bubbles are a funny addition, either in combination with the case or individually as a set.

We also have ready-made **wooden props** in our repertoire, which provide an extra laugh at every party.

A small **DIY prop set** is included in our package prices free of charge upon request. All you have to do is glue the individual cardboard props together with the enclosed adhesive dots and off you go.

flip book

get your party started!

flip book

With our photobooth or photo stand a short video is taken, which is printed within 90 seconds as a small photo book. If you flip through the pages of the book quickly, the scene comes to life. Flip books are a unique way to make your event unforgettable - and there's no doubt that your guests will give their best to capture the most absurd, funny and amusing scenes.

The recording time is 6 seconds, after which the 28 images are immediately printed and processed into a finished flipbook. (We would be happy to print several copies on request.)

the template file for the creation can be found in the info package

create your own flip book cover with the dimensions 747x620 px (JPEG)

- ✳ individual flip book cover
- ✳ branding of the photo stand
- ✳ individual backdrops

- ✳ fast processing within 90sec.
- ✳ professional dye-sub-printer and DSLR-camera
- ✳ incl. operator/hostess

small flip-book sequence, 28 images are taken in 6 seconds, then printed and bound together on site

GIF- and videobooth

... and aaaaction!

Our **GIF-booths** are the modern and funny counterpart to classic photo machines. An animation is created from a series of four photos and sent directly to your guests. This allows them to share their own GIFs directly on their social media channels. Besides the classic GIF, the GIF machine can also record video loops, known as boomerangs at Instagram. The GIFs not only get the party going, they are the party!

Classic: a GIF is created from up to 4 individual photos, photo print incl. branding/overlay is possible, immediately shareable via Facebook, Twitter, Mail (Instagram)

Boomerang: a GIF loop (forward/reverse endless loop) is created from a short video sequence, immediately shareable via Facebook, Twitter, Mail (Instagram), overlay branding possible

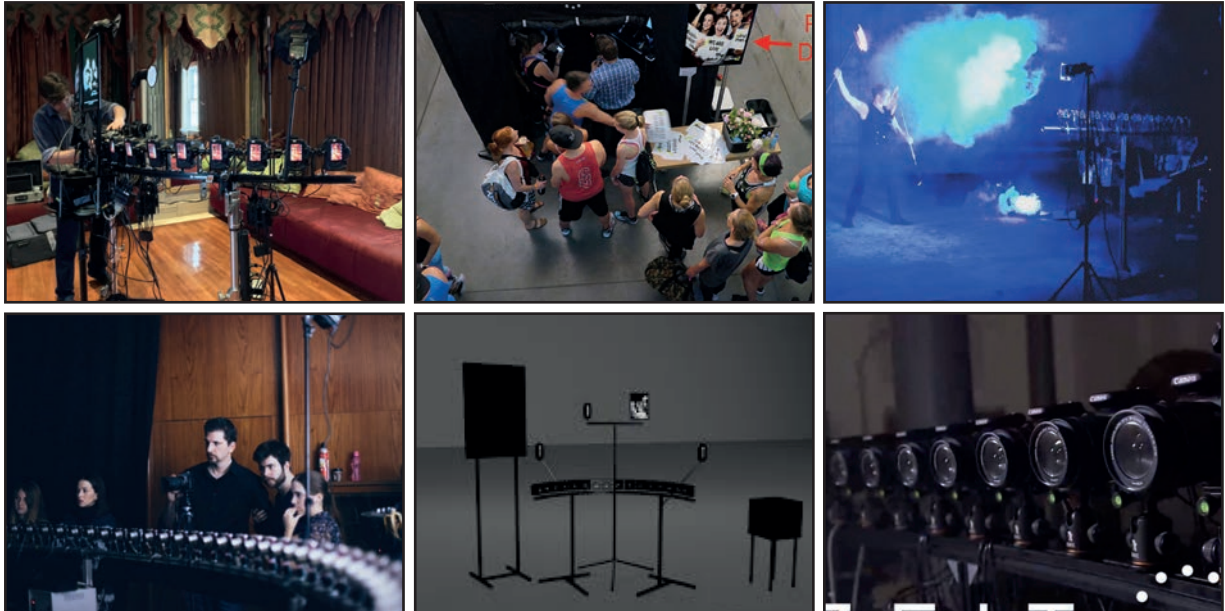

Our **videobooth** puts your guests in the spotlight and they can record their very personal message. Whether memories, jokes, experiences, songs, congratulations or the best moves, it records everything.

- Simple operation via touch screen
- with voice recording
- DSLR camera
- Possibility to brand the video afterwards
- Branding and adaptation of the entire videobooth
- social-media sharing

3D photography

stop time for a moment

If you want your event to leave a lasting impression, if you want to make a brand experience of a special kind possible, then a **multi-camera-array** is just right for you.

You have our 3D photos right on your mobile phone, you can post them and they are interactive: You can move them on your smartphone or by mouse.

The most compact multi-camera-array of 16 SLR cameras at 135 degrees at 1.10 meters radius is particularly well suited for smaller events or customer activations. Up to eight people can be photographed in portrait mode.

Our basic package includes:

- 3D photo module with 16 or 25 cameras, incl. operator
- lighting system consisting of three flash units
- 49" inch screen for widely visible results, visitor magnet
- setup of the landing pages for the picture galleries, according to your specifications (logos, colors, texts), animated GIFs and videos, downloadable
- transfer of URLs by photographing or scanning a QR code from the screen
- provision of an event gallery additionally possible
- light painting with LED-rod with 160 LEDs for light painting additionally possible (logos can also be drawn into the picture)

photos are available as

- interactive photos (online only)
- interactive photos with download (to view online and offline)
- self-running videos
- self-running GIFs
- Download of the individual 16 photos from the cameras
