

photo stand standard - exterior branding

dimensions

width:	65	cm
depth:	46	cm
height:	175	cm
with flash:	210	cm

surfaces for exterior branding:

- front: forex plate in front
- left side: The surface without rounding has a size of 545x460mm (applies to both sides).
- right side: On the right side is the photo output-tray. This area must be left out. Please place the output tray all around with 5mm bleed margin to the inside.

The entire surface including the roundings and top and bottom side is 1335x460mm.

The transition from the straight surface to the rounded surface is smooth. Due to the fact that the surfaces are not clearly defined, the sides are not very suitable for flat branding, but rather for lettering or logos in contour cut.

Template files in EPS format are available in the info folder for creating the print data.
